

# Facial Recognition Solution

## More Images. Better Recognition. Faster Results.

That's what you get with Vigilant's facial recognition solution. The only solution that quickly analyzes 350 facial vectors against your complete gallery of known images for more accurate recognition. Vigilant's facial recognition is available when and where you need it - via the web, mobile devices and desktop PCs. Use Vigilant's facial recognition to validate identities in the field, to develop investigative leads from images of unknown individuals, or to better secure a facility from potential threats.

## Versatile and accurate facial recognition when and where you need it

### Field Officer: Mobile App

- Snap photos to quickly identify individuals in the field
- Upload photos to agency gallery and share as needed
- Easily search gallery for individuals

### Analyst: Browser-based/Desktop

- Upload images from any source to match against
- Images automatically matched against gallery to identify unknown individuals

### Watchlist:

- Watchlist management from any device
- Receive alerts important to your assignment

### Streaming Facial Recognition

- Easily add facial recognition to your existing video and/or IP camera system
- Catalog faces, match against watchlists, and generate alerts
- Analyze stored video from other sources for cataloging and matching

# Automatic Number Plate Recognition

**More Leads. Increased Awareness. Faster Results.**

That's what you get with Vigilant's essential law enforcement tools. Stretched budgets, expanding workloads and increased scrutiny place added pressure on law enforcement agencies. LEARN™ goes beyond the typical ANPR solution with Vigilant's exclusive analytic tools.

**ANPR** »

Take number plate recognition out of the box.

## Generate more leads. Improve officer safety. Where and when you need it.

### Field Officer: Mobile App
